READY, SET, GO!

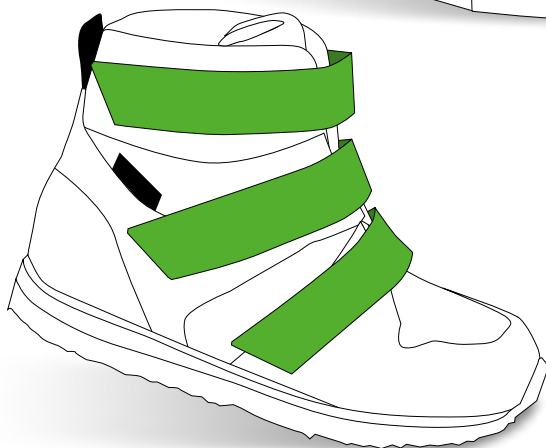

Since tastes differ, Perpedes therapeutic shoes offer something for every customer in terms of closure. With all types of closure, it is possible to put on and take off the shoes quickly and easily.

Therapy shoes with the innovative BOA Fit System even allow almost barrier-free entry.

ZIPPER

Two laterally placed zippers provide a particularly wide and easy entry. With additional lacing for width adjustment and the optical effect.

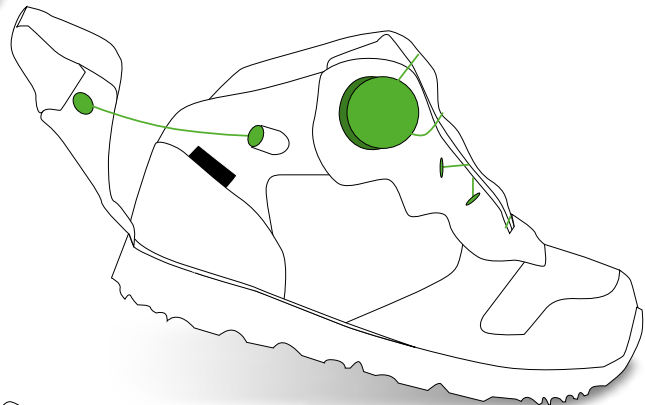

VELCRO CLOSURE

Our therapeutic shoes with velcro closure are the ideal solution for motor impairments: Easy to grip and quick and wide to open or close.

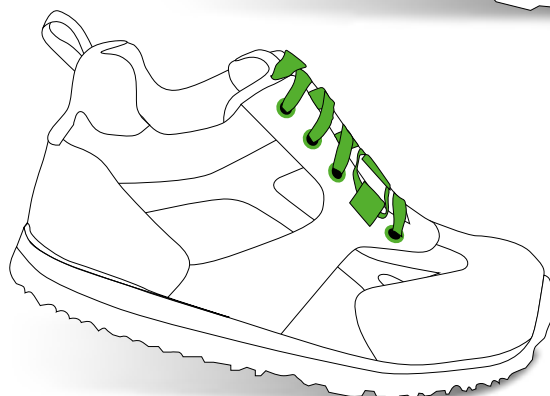

BOA® FIT SYSTEM

Innovative and proven: The wide opening with rear entry means you're ready to go right away and can concentrate on the important things in life. Details on page 23.

LACING

Our classic lace-ups can be easily and creatively adapted to individual outfits with your own laces.

FOR SPECIALTY RETAILER:

SIMPLE ORDERS!

Just order your favourite therapeutic shoe whenever and wherever you want: go online and order comfortably from your tablet or Computer.

NOW WITH MORE COMFORT

For your orders you have the possibility now to consign a commission, as well as your internal order number. These information will be written on all your order documents and help you to have a better overview on your orders.

NEW AVAILABILITY CHECK

Simple to use and reliable. Check at any time in our online shop, if your desired therapeutic shoe is in stock.

WWW.PERPEDES.COM

TIP: OUR DISCONTINUED STYLES

Models that are no longer available in all widths and sizes can be easily identified by the green star next to the article names, the label SALE, the diamond-shaped notice with QR code and the notice text at the bottom of the respective page.

Here we recommend that you check the available stock of the desired variant before buying: best online in the new availability check.

SANDALS AND BALLET FLATS

Comfortable, modern and breezy. All of our styles allow your feet to „breathe“, offer firm support and are easy to put on and off thanks to handy hook-and-loop straps. Excellent manufacturing and high quality materials ensure a high level of comfort to let you thoroughly enjoy walking.

AV68	AV	18 – 40			

A close-up photograph of two young boys with short brown hair, smiling and laughing joyfully. The boy on the left is wearing a light blue hoodie and has his mouth wide open, showing his teeth. The boy on the right is wearing a green and white striped polo shirt and is pointing towards the camera with a wide smile. The background is a soft-focus green, suggesting an outdoor setting with trees or bushes.

BOA[®]

BOA[®] FIT SYSTEM ADVANTAGES

- One-handed operation
- Allows you to get your shoe on and off fast
- Instant micro-adjustments for a precise and custom fit
- Secure fit thanks to an even spread of tension across the laces
- More weather resistant than e.g. hook-and-loop fasteners
- Long-lasting thanks to high quality materials

BOA SNEAKERS

Shoehorns and laces are too traditional for you? Then try the innovative Boa® Fit System and the wide rear opening – you are immediately good to go and can focus on the important things in life. Our extensive range of products includes sneakers in a variety of material and color combinations – some of them will surely fit your taste.

INFORMATION

ORTHOTIC SHOES

3-WIDTHS SYSTEM

The Perpedes „3-Widths System“ was designed and tested in close collaboration with orthopedic (shoe) technicians and is optimized for foot and leg orthoses (AFOs/DAFOs) in various designs and wall thicknesses.

This development of shoe lasts with their unique geometry results in 3 different widths – OT2, OT5 and OT8.

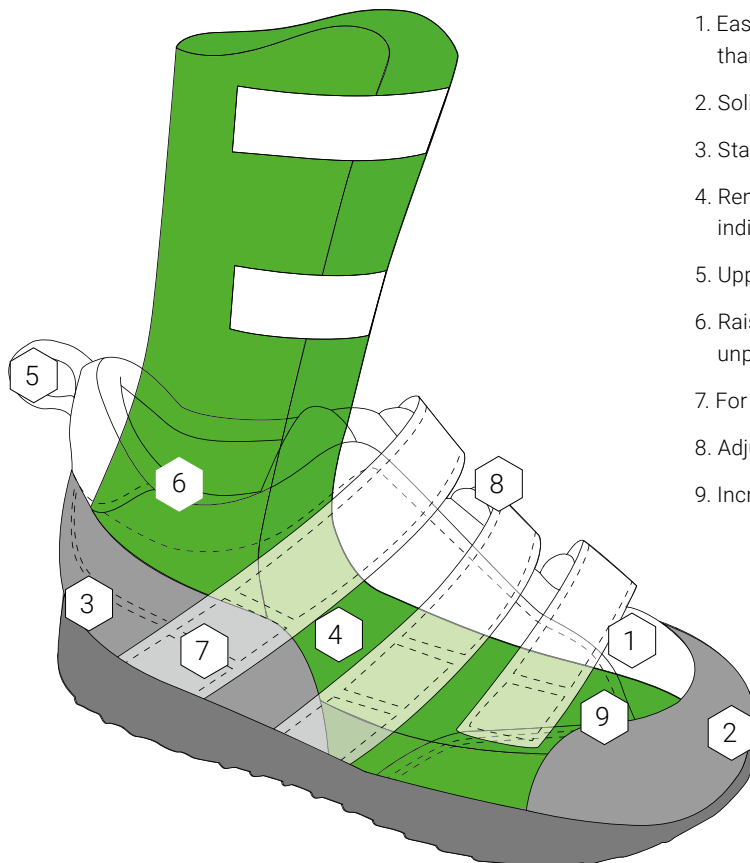

Compared to the width OT2, each OT5 and OT8 offer increased volume in the heel, instep and toe box area. The “3-Widths System” offers a wider sole construction with ball rockers that provide guided stability in standing and locomotion. The sole material offers options for individual orthopedic modifications.

WIDTH SELECTION

OT2 – for thin (2–3 mm wall thickness) AFOs/DAFOs and foot orthoses / suitable for the non-effected foot in case of unilateral orthotic treatment

OT5 – for AFOs/DAFOs with 4–6 mm wall thickness

OT8 – for AFOs/DAFOs with 7–10 mm wall thickness

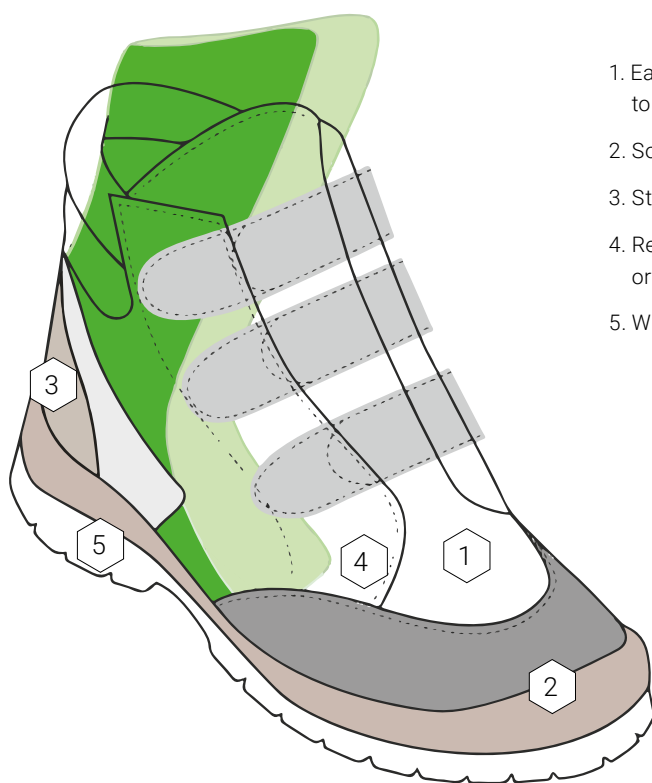

1. Easy to step in/get out with an AFO/DAFO thanks to the wide to open fasteners and tongue
2. Solid, protective toe box
3. Stable heel counter for more hindfoot stability
4. Removable EVA inlays as placeholders for individual (foot) orthoses
5. Upper loop (for selected models)
6. Raised, flexible and cushioned topline to prevent unpleasant pressure and friction
7. For selected styles: Hook & loop straps, easy to trim
8. Adjustable fasteners
9. Increased volumes in the toe box area

2-WIDTHS SYSTEM

For high comfort and stability while walking with variegated orthotic applications. Due to the extended size range and trendy designs, therapy shoes by Perpedes can be worn at any age.

The broader inner sole and the enlarged upper volume offer enough space for different types of orthoses: OT-shoes for thin AFOs/DAFOs, Perpedes NS-shoes for low profile foot orthoses. Suitable for the non-affected foot in case of unilateral orthotic treatment.

1. Easy to step in/get out with an AFO/DAFO thanks to the wide to open fasteners and tongue
2. Solid, protective toe box
3. Stable heel counter
4. Removable EVA inlays as placeholders for individual (foot) orthoses
5. Wide, flexible and lightweight soles for safe gait pattern

OT2	ORTHOSIS (< 4 MM WALL THICKNESS)		3-WIDTHS SYSTEM
OT5	ORTHOSIS (4 – 6 MM WALL THICKNESS)		2-WIDTHS SYSTEM

Different hindfoot volumes

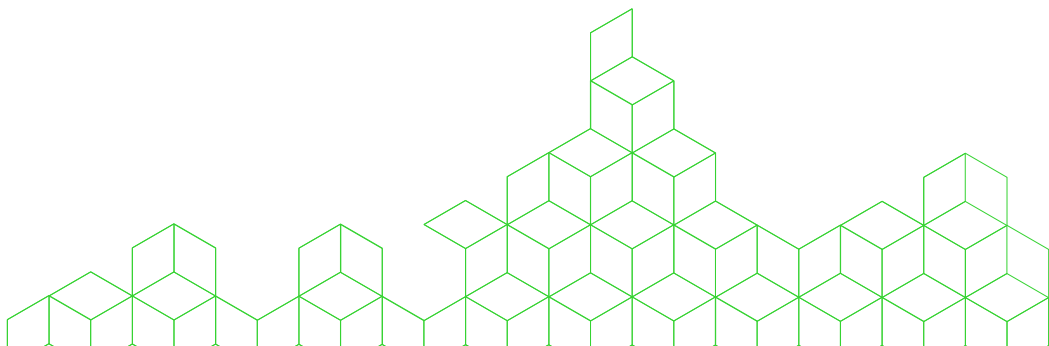

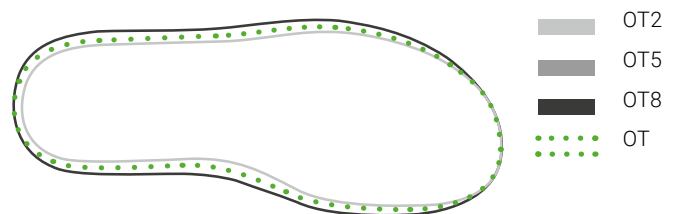

Heel spring suitable to shoe sizes

TEMPLATES

Template comparison of OT (from the 2-Widths-System) vs. OT2 vs. OT5 vs. OT8 (from the 3-Widths-System)

Outlines optimized for AFOs / DAFOs

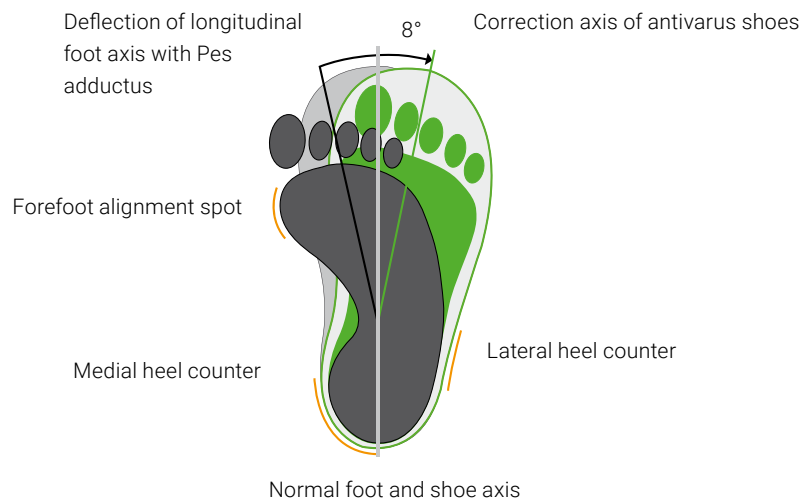

ANTIVARUS SHOE

For the therapy of Pes adductus / pigeon toes in children, recurrent or post-operative clubfoot and to guarantee a physiologically correct gait pattern.

FOREFOOT CORRECTION

The straightening of the adducted forefoot is being done by the well known "3-point correction". In addition with the medial and lateral hindfoot grip provided by the heel counter, the medially extended portion of the heel counter realigns the forefoot in the area of MTP-joint by 8° towards lateral. Antivarus shoes by Perpedes are famous for their comfortable fit as well as for the high material and manufacturing quality. Perpedes NS-shoes are suitable for the non-affected foot in case of unilateral antivarus treatment.

TECHNICAL FEATURES AND BEFEFITS

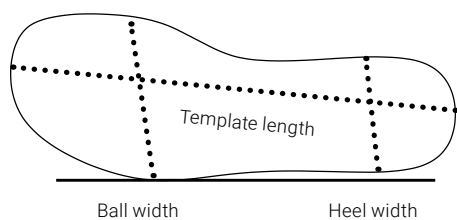

- Removable inlay to be replaced with individual foot orthoses
- Easy to get in / get out as of the wide to open closure
- Solid heel counter for a good hindfoot fixation without restrictions
- Firm medially extended heel counter for the forefoot's alignment
- Firm toe cap to assist the foot's treatment purpose
- Flexible and lightweight soles for an effortless gait pattern
- High wearing comfort by using materials of finest quality

(Inner shoe) Template dimensions

Perpedes' therapy shoes already include a length allowance of 1.2 - 1.5 cm. You only measure the foot length and read the corresponding shoe size.

Proper inner shoe length / proper shoe size
= foot length in cm + allowance (1.2 - 1.5 cm)

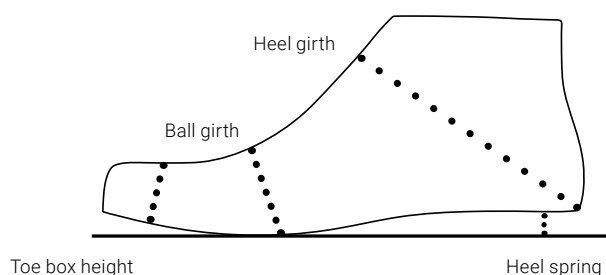

EXAMPLE:

Measured foot length of 21.8 cm + allowance = 23.4 cm.
Our recommendation: size 35

All measurements in cm. (Exception: shoe size)

Perpedes' therapy shoes already include a length allowance of 1.2 – 1.5 cm. You only measure the foot length and read the corresponding shoe size.

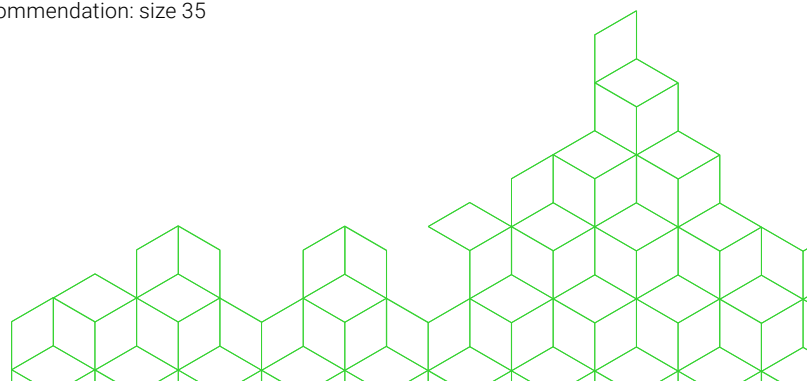

Proper inner shoe length / proper shoe size
= foot length in cm + allowance (1.2 – 1.5 cm)

EXAMPLE:

Measured foot length of 21.8 cm + allowance = 23.4 cm.
Our recommendation: size 35

- *OT = AFOs/DAFOs
- *NS = Normal shoes
- *AV = Antivarus shoes

All measurements in cm. (Exception: shoe size)

»EXTRALIGHT« ON THE ROAD

Many of the Perpedes therapy shoes are equipped with an **EXTRALIGHT® outsole**, which is optimally adapted to the Perpedes width system. This significantly increases the quality of care for your patients when wearing an orthosis.

The EXTRALIGHT® outsole provides **good dynamics in the roll-over** and **high flexibility in the forefoot** to support the orthosis.

EXTRALIGHT® primarily stands for good energy absorption as well as return. The outsole cushions the steps of the patient. It thus provides **pressure relief** and an excellent walking experience.

The innovative EXTRALIGHT® material used for our outsole is also **exceptionally light**. It lowers the overall weight of the Perpedes therapy shoes. Ideal for increasing the dynamics of patients.

Our shoes with white EXTRALIGHT® soles do not cause abrasion on floors - our sneakers in sporty designs are therefore also perfect as indoor shoes.

EXTRALIGHT® also withstands extreme temperatures and conditions, making it **wear-resistant and durable** in normal everyday

use. Even under continuous stress, it retains its cushioning properties and remains elastic, which guarantees a good heel-to-toe movement. The perfect basis for our Perpedes therapy shoes.

SOLE FOR OPTIMAL GRIP

The outsole is the basis of every shoe, protects the foot and is the most important ground beneath our feet. Discover which outsoles are used for Perpedes' therapy shoes and what makes them so unique. Once in advance, all outsoles offer a large surface for increased gait stability and

are designed to ensure a natural heel-to-toe movement.

RUBBER SOLE - THE STURDY ONE

- Short: TR-Sole
- High slip resistance due to a deep sole profile
- Low wear due to high abrasion resistance
- Lighter than comparable soles made of rubber

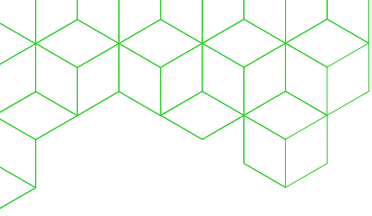

SOLE PROFILE FROM

KINGSTON

PERPEDES EXTRALIGHT – THE LIGHTWEIGHT

- Lightweight and highly slip resistant
- High flexibility and good shock absorption
- Very good pressure relief
- Low wear due to high abrasion resistance
- Individual adjustments possible
- White sole: Non-marking, hence suitable for gym floors

ALSO AVAILABLE AS AN ACCESSORY

PERPEDES WINTER SOLE – THE SAFE ONE

- Non-slip rubber soles with integrated EVA-wedge
- High slip resistance
- Individual adjustments possible
- Low wear due to high abrasion resistance

SAWTOOTH-SOLE – THE RELIABLE ONE

- Non-slip rubber soles with integrated EVA-wedge
- High slip resistance due to a well defined sole profile
- Low wear due to high abrasion resistance
- Individual adjustments possible

CILINDRETTI SOLE – THE SPECIAL ONE

- Rubber soles with integrated EVA-wedge
- Individual adjustments possible

EVA SOLE – THE FAMILIAR ONE

- Shock absorbent properties
- Durable and long-lasting
